

# Don't take my word for it – try it for yourself!

I WAS like every other golfer who read about Pro Golf IQ for the first time – sceptical.

I'd been told all these stories of how it had worked wonders for golfers around the world, but I'd still sit back and say to myself 'Listening to an audio program can't fix my game' – 'my problem is more of a mental thing anyway'.

BINGO. Right there and then I was introduced to Pro Golf IQ and I haven't looked back.

Since completing the Pro Golf IQ program I have improved out of sight and achieved things out on the course that seemed unrealistic just weeks ago.

For a start I've become a more relaxed person – out on the course, at home and at work. This is a direct result of the brain-training audio sessions, which used a mixture of

sounds and music to get my body in a deepened state of rest and I can now return to this state whenever I want.

Out on the course, well I couldn't believe what a few short weeks of 'mental application' could do to my game.

My inner demons that had wreaked havoc with my game for so long were gone. No more shanks at the most inconvenient times, no more lack of confidence when trying to hit the green and split the bunkers. I wasn't even trying to keep score either. Hey that's weird for me? And I'm not getting too angry when I do mis-hit one either. That's very weird!

Pro Golf IQ had me wanting to play every day and I had so much confidence that I went and obtained my AGU handicap. After not having a

handicap for eight years, I'm playing off five and I'm confident my game has the consistency to stay there, if not improve.

But my greatest result since using Pro Golf IQ was my first ever hole-in-one. While these are rare and require some degree of luck on landing, my new pre-shot routine of picturing my shot and then executing it paid the ultimate dividends. I can't explain how important 'shutting off' before you swing is, but it is something you will learn using Pro Golf IQ.

Terry Price once told me how so many people approach him about the program and ask how it helps him, and he simply tells them to 'try it for themselves' because at the end of the day, that's the best way to explain Pro Golf IQ. By getting the guaranteed results yourself, you get a better understanding of how this revolutionary audio program works, and why it is no longer the best kept secret in world golf.

It doesn't matter if you play off 36 or 1 – take the challenge now and impress your mates the next time

you play. I'm telling you, this game is all mental and Pro Golf IQ is guaranteed to blow your mind.

## In Summary – What Pro Golf IQ has given me?

- Total control of my mental game
- Eliminated my shanks and bad mis-hits brought on by fear and lack of confidence
- The crucial ability to 'shut off' like a pro before I take my swing
- Improved my stress levels, not just on golf course but at home and at work
- Helped me score my first ever hole-in-one with a relaxed pre-shot routine
- Gave me the confidence to play more regularly and regain my AGU Handicap of 5

## See what amateur golfers from around the world have to say about Pro Golf IQ

“AFTER using the program and shooting 86 compared than over 100, I am totally convinced. I don't know how the program works, but all I do know is the more I listen to this program, the lower my handicap has become.”

**Kevin McCarthy, QLD**

“Well, I was pretty skeptical to begin with but I thought I'd give it a go, but you know what, I think it actually works. The key to it is helping to relax on the tee box whether its the 1st or the 17th.”

**Justin Armsden, SPORTS Presenter, CNN Living Golf**

“I am so happy with my decision to purchase this product from you. You can not imagine the tension & pressure removed prior to your game of golf, but I have also adapted this relaxation & stratgies to work pressure situations. I couldn't wait to start my first session. My golf game has improved so much.”

“WELL 4 months ago, I was always shooting over 100, 110, 112 and now I'm regularly shooting low 90s down as low as 90. Just listen to the program for about 25 minutes 3 times a week and within a few weeks, you'll be playing the best golf of your life!”

**Ellen Neale, Gold Coast**

“I first took up the ProGolf IQ program with an open mind. Not sure whether to believe the claims but willing to give it a try and a chance. I think that the program should not be misunderstood for a magic wand. The participant MUST put in commitment, belief and training both in the mind, the body and”

“Well just a quick history, i have rediscovered golf after about 20 years! The main reason why i stopper playing all that time ago, other than testosterone kicking in and finding night clubs, bars and girls! was that i had so much anxiety at every tee box it was just crippling, not to menti”

“I used to get stressed on the golf course after a bad shot, but now I am calm and can focus on the next shot. If you can show me any other piece of equipment which can improve my golf a simply as Pro Golf IQ I'll do cartwheels!”

**Darrel Hipkiss, QLD**

“I am now onto session five having listened to sessions one through to four over the previous few weeks. Up until then my scoring had been inconsistent, that is flashes of 'good' and 'very good' but always with 'poor' in between - as I said inconsistent. Over the last seven weeks, playing”

“I have completed the Session 2 program – with a difference! Last Friday I took myself off to a quiet place and played the session only to have a lot of static off a CD player in one of our (B&B) bedrooms. Concerned by this (I knew static like sounds were to be part of the program but th”
